**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

### Office Action Summary

**Application No.**

10/587,111

**Applicant(s)**

RICHARDSON ET AL.

**Examiner**

HEE-YONG KIM

**Art Unit**

2621

**Period for Reply** -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 25-47 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 25-47 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 20 June 2008 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO/SB/CD)  
Paper No(s)/Mail Date See Continuation Sheet.
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date \_\_\_\_.
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: \_\_\_\_.

7/24/2006, 2/11/2008, 7/3/2008, 7/14/2008, 10/17/2008, and 3/23/2009

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. **Claims 46-47** are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 46 and 47 recites "de-embedding parameter information in a portion of the file separate from the video information for facilitating processed of video information when streamed" which is not disclosed in the specification and the original claims.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. **Claims 30 and 31** are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

**Claims 30 and 31** recites the limitation "the parameter Set information" in claim

29. There is insufficient antecedent basis for this limitation in the claim.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. **Claims 25-27, 32, 34-38, 43, and 45-47** are rejected under 35 U.S.C. 102(b) as being anticipated by Jones (US 6,134,243), hereafter referenced as Jones.

Regarding **claim 25**, Jones discloses Method and Apparatus for Media Data Transmission. Jones specifically discloses A method for streaming a file containing video information (streaming of media data, col.9, line 20) , comprising the step of: embedding parameter information (Hint track includes header information, col.9, line 28-39), for facilitating streaming of the video information (instruction for a streaming video, col.9, line 28-39), in a portion of the file separate from the video information (hint area separate and distinct from media data, col.8, line 27-30) so that the parameter information can be streamed independent of the video information (Fig.15).

Regarding **claim 26**, Jones discloses everything claimed above (see claim 25). Jones further discloses wherein the step of embedding the parameter further comprises embedding the parameter information within a hint track of the file (Hint track includes header information, col.9, line 28-39).

Regarding **claim 27**, Jones discloses everything claimed above (see claim 26). Jones further discloses wherein the step of embedding the parameter further comprises

the step of embedding the parameter information in a Session Description Protocol (SDP) payload (SDP, col.24, line 56) of the hint track.

Regarding **claim 32**, Jones discloses everything claimed above (see claim 25). In addition, Jones discloses further comprising the step of transmitting the parameter information in a media independent transmission (Jones: network-independent, col.9, line 59-60).

Regarding **claim 34**, Jones discloses everything claimed above (see claim 25). In addition, Jones discloses further comprising the step of extracting the parameter information from metadata corresponding to at least one media stream (hint packets received, col.18, line 1-2)

Regarding **claim 35**, Jones discloses A file containing video information and parameter information (file containing media data and hint track, col.8, line 27-30), the parameter information embedded in a portion of the file separate from the video information (hint area separate and distinct from media data, col.8, line 27-30) so that the parameter information can be streamed independent of the video information (Fig.15).

Regarding **claim 36**, the claimed invention is an apparatus claim corresponding to the method claim 25. Therefore, it is rejected for the same reason as claim 25.

Regarding **claim 37**, the claimed invention is an apparatus claim corresponding to the method claim 26. Therefore, it is rejected for the same reason as claim 26.

Regarding **claim 38**, the claimed invention is an apparatus claim corresponding to the method claim 27. Therefore, it is rejected for the same reason as claim 27.

Regarding **claim 43**, the claimed invention is an apparatus claim corresponding to the method claim 32. Therefore, it is rejected for the same reason as claim 32.

Regarding **claim 45**, the claimed invention is an apparatus claim corresponding to the method claim 34. Therefore, it is rejected for the same reason as claim 34.

Regarding **claim 46**, Jones discloses A method for processing a file containing video information, comprising the steps of:  
de-embedding parameter information (hint packet received via data communication, col.18, line 1-2) in a portion of the file separate from the video information (hint area separate and distinct from media data, col.8, line 27-30) for facilitating processed of video information (instruction for a streaming video, col.9, line 28-39) when streamed.

Regarding **claim 47**, the claimed invention is an apparatus claim corresponding to the method claim 46. Therefore, it is rejected for the same reason as claim 47.

### ***Claim Rejections - 35 USC § 103***

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. **Claims 28 and 39** are rejected under 35 U.S.C. 103(a) as being unpatentable over Jones, in view of Mononen (US 2005/0,004,968) (hereafter referenced as Mononen).

Regarding **claim 28**, Jones discloses everything claimed as above (see claim 27). However, Jones fails to disclose wherein the step of embedding the parameter further comprises the step of encoding the parameter information in Multipurpose Internet Mail Extensions (MIME) prior to being embedded within the SDP payload of the Hint track.

In analogous field of endeavor, Mononen discloses System, Apparatus, And Method for a Mobile Information Center. Mononen specifically discloses encoding in Multipurpose Internet Mail Extensions (MIME) prior to being embedded within the SDP payload (Fig.2 shows MIME encoding 236 prior to SDP 228), in order to provide rich content communication including voice and video through internet (paragraph 2).

Therefore, given this teaching, it would have been obvious to one of ordinary skill in the art at the time invention was made to modify Jones by providing specifically encoding the Parameter Set information in Multipurpose Internet Mail Extensions (MIME) prior to being embedded within the SDP payload of the Hint track, in order to provide rich content communication including voice and video through internet. The Jones method, further incorporating the Mononen encoding the parameter information in Multipurpose Internet Mail Extensions (MIME) prior to being embedded within the SDP payload of the Hint track, has all the features of claim 28.

Regarding **claim 39**, the claimed invention is an apparatus claim corresponding to the method claim 28. Therefore, it is rejected for the same reason as claim 28.

9. **Claims 29-31, 33, 40-42, and 44** are rejected under 35 U.S.C. 103(a) as being unpatentable over Jones, further in view of MPEG 2001/N4858 (hereafter referenced as N4858).

Regarding **claim 29**, Jones discloses everything claimed as above (see claim 25). However, Jones fails to disclose further comprising the step of transmitting the Parameter information in an out-of-band transmission.

In analogous field of endeavor, N4858 discloses Coding of Moving Pictures and Audio. N4858 specifically discloses transmitting the Parameter Set information in an out-of-band transmission (parameter sets are sent out of band ), in order to transmit media in the cable environment.

Therefore, given this teaching, it would have been obvious to one of ordinary skill in the art at the time invention was made to modify Visharam and Jones by providing specifically transmitting the Parameter information in an out-of-band transmission, in order to transmit in the cable environment. The Jones method, further incorporating the N4858 transmitting the Parameter Set information in an out-of-band transmission for the cable, has all the features of claim 29.

Regarding **claim 30**, the Jones method, further incorporating the N4858 transmitting the Parameter Set information in an out-of-band transmission for the cable as applied to claim 4, discloses wherein said transmitting step transmits the Parameter Set information using Transmission Control Protocol (TCP) (Jones: TCP/IP, col.13, line 67) .

Regarding **claim 31**, the Jones method, further incorporating the N4858 transmitting the Parameter Set information in an out-of-band transmission for the cable as applied to claim 4, discloses wherein said transmitting step transmits the Parameter Set information using Real Time Streaming Protocol (Jones: RTP, col.11, line 38-40).

Regarding **claim 33**, Jones discloses everything claimed as above (see claim 25). However, Jones fail to disclose wherein said transmitting step transmits the Parameter information prior to any media corresponding thereto.

N4858 discloses wherein said transmitting step transmits the Parameter information prior to any media corresponding thereto (Fig. 5b shows parameters transmitted before the picture slice (main media body), in order to inform the receiver to set up the presentation such as picture size and frame rate included in parameter set prior to transmitting the associated media (well known in the video compression art).

Therefore, given this teaching, it would have been obvious to one of ordinary skill in the art at the time invention was made to modify Jones by providing specifically transmitting the Parameter Set information prior to any media associated with it, in order to inform the receiver to set up the presentation such as picture size and frame rate included in parameter set prior to transmitting the associated media. The Jones method, incorporating the N4858 transmitting the Parameter Set information prior to any media associated with it, has all the features of claim 33.

Regarding **claim 40**, the claimed invention is an apparatus claim corresponding to the method claim 29. Therefore, it is rejected for the same reason as claim 29.

Regarding **claim 41**, the claimed invention is an apparatus claim corresponding to the method claim 30. Therefore, it is rejected for the same reason as claim 30.

Regarding **claim 42**, the claimed invention is an apparatus claim corresponding to the method claim 31. Therefore, it is rejected for the same reason as claim 31.

Regarding **claim 44**, the claimed invention is an apparatus claim corresponding to the method claim 33. Therefore, it is rejected for the same reason as claim 33.

### ***Conclusion***

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Visharam (US 2003/0,163,781) discloses Method and Apparatus for Supporting Advanced Coding.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HEE-YONG KIM whose telephone number is (571)270-3669. The examiner can normally be reached on Monday-Thursday, 8:00am-5pm EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marsha Banks-Harold can be reached on 571-272-7905. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
